

8H Pillow Z1

pillowcase Evolon

1. Remove the cushion from a package.

2. Using unpacking chip, cut a PE skin.

3. Remove the pillow from a plastic bag.

4. Beat down the pillow on two sides to it resumed its original shape.

5. Put on Evolon pillow case.

6. To clean the pillow, open the top cover zipper

Cut vacuum package

Before use

- Please use extracting chip, cut the vacuum pack bag and wait while pillow resumed its original form;
- External material of the pillow made of high-tech environmentally friendly materials that are very sensitive, so you may not use sharp cutting objects, as they may damage the pillow;
- After opening vacuum packaging, the presence of wrinkles and irregularities are normal; 72 hours after unpacking pillow, it will resume its normal shape;

Don't wash

Chemical cleaning recommended

Undesirable prolonged exposure under the sun

Using

- Natural latex is sensitive material, so do not use much power to pull the pillow to avoid damaging it;
- Do not let children play with the zipper, which located on the side of the pillow;
- To produce 8H Z1 pillows was used high quality pure natural latex, which can give off a faint smell, reminiscent of incense (not toxic, no harmful). We ask users who are allergic to latex, use caution with this product;

Cleaning

- Natural latex is easy to clean by hand. Do not wash the pillow in a washing machine, as a result natural latex can rapidly deteriorate;
- When hand washing as much as possible try to compress the pillow so that it absorbed more water. While removing it from the water, hold the pillow with both hands;
- When dry, remove the pillow from direct sunlight as this will lead to rapid aging and shorten life;
- Prevent any effect of sunlight on the pillow. Since this will lead to the transformation of the surface layers of latex to powder;
- Over a period of time natural latex can be oxidized, its color will gradually become yellow, this is normal.

Introducing

Developing 8N Z1 pillow, we paid special attention to the quality of materials, health of users, the environment. We used high-tech, environmentally friendly materials, and using an ergonomic, flexible, high-tech design for maximum user comfort. Enjoy consistent, high quality deep sleeping.

Product Features

Protection from ticks

Use of special pillowcase, made of special ticks protective material from the German company Evolon. No chemical coating, but the pillowcase effectively prevents the penetration and spread of insects, bacteria and other harmful organisms that can pass through the fabric. So you can be sure that your sleep will be safe and comfortable.

Environmentally safe material

Pillow filler is high quality natural Malaysian latex. The presence of specific proteins in latex and prevents the spread of bacteria, ticks and potential allergens, thereby guaranteeing a good sleep.

Comfortable support

Natural latex is used as a filler of the pillow, has ultra-high elasticity and firmness. It adjusts the position of your head and neck and hold a form. Pillow evenly distributes the force of pressure and provides comfortable support, and do not deform after long periods of use.

Air circulation

Pillow has more than 10 000 small sot that leak air and which release excess heat and humidity. This is natural ventilation, which promotes a healthy and deep sleeping.
