

Smart Wifi PTZ Camera Quick Start Guide

Please read this guide carefully before using the product, and please keep it properly.

Product Description

Product Parameters

Include: Smart Wifi PTZ Camera×1, Power Adaptor×1, Quick Start Guide×1, Screw Bag×1

Product Type: XVW-6620S-Q8

Resolution: 1080P

Image Enhancement: 3D digital

noise reduction

PTZ angle of view: 355°

Audio System: Two-way Talk

Storage: Micro SD Card/Cloud Storage

Working Temperature: -10°C~50°C

Power Input: DC-5V/1A(Main Device)

100-240V~ 50-60Hz 0.4A(Adaptor)

Lens: F2.3 aperture, 3.6mm focal length

Night Vision Lights: 4 Infrared Lights

Connection Method: Wi-Fi/802.11b/g/n/2.4GHz

Supported Platform: Android4.4/ios9.0 and above

Working Humidity: ≤75% (40°C Room Temperature Environment)

About works with Mijia

The product works with Mijia, and can be controlled through Mijia app.

Scan the QR code to download and install the Mijia APP. Users who have installed the Mijia APP will directly enter the device connection page. You can also search for "Mijia" in the app store, and download from there. Open the homepage on Mijia, click "+" in the upper right corner of the page, and add devices according to the app prompt.

Note: Due to the upgrade and update of the Mijia app, the actual operation may be slightly different from the above description; please follow the instructions in the app.

Please note that "works with Mijia" is only for software verification, and Xiaomi and Mijia are not responsible for the production, standard implementation, quality supervision and other aspects of the product and enterprise.

Power On

Plug the power cable into the power jack of the camera; the camera will automatically turn on, and it will prompt "wifi connected"

Adding Devices (Android)

Open the homepage of Mijia app and click "+" in the upper right corner of the page to add a device;

Select "Smart Wifi PTZ Camera."

2. Select the WiFi router you need to connect to and fill in the WiFi password; place the phone as close as possible to the device and wait for the software to be automatically configured.

Adding Devices (iOS)

Open the homepage of Mijia app and click "+" in the upper right corner of the page to add a device; select "Smart Wifi PTZ Camera."

2. Select the WiFi router that you need to connect to and fill in the WiFi password. Then, go to the next step of connection and follow the prompts “Go to Wi-Fi settings” to enter the system settings to connect to WiFi.

3. After choosing to connect the mobile phone to the device WiFi, “xiaovv-camera-xvsnowman_xxx,” return to the Mijia APP, and go to the automatic configuration. Put the mobile phone as close as possible to the device, and wait for the software to be automatically configured.

Live View

After successfully adding the device, you can find it on the homepage list and select it to watch a live video stream. Through the control screen of the camera, you can perform operations such as screen capture and remote call.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
